**Lab Manual – S3 – Glacier**

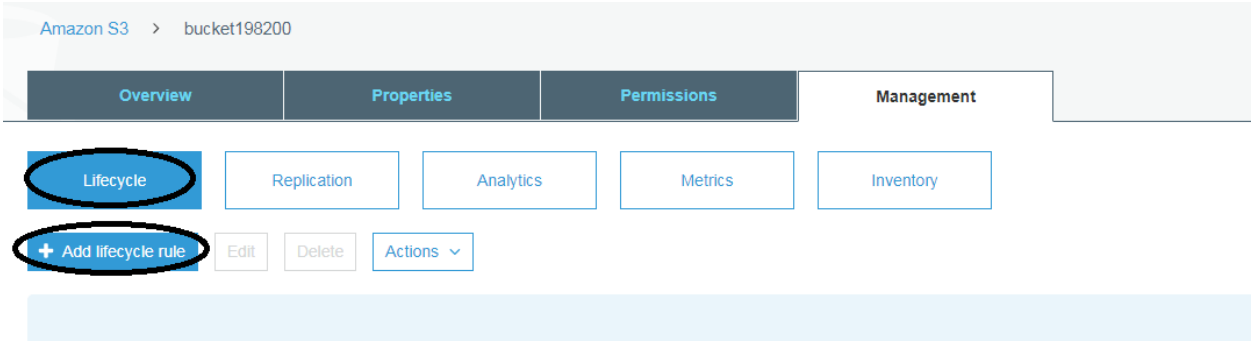
Objective:

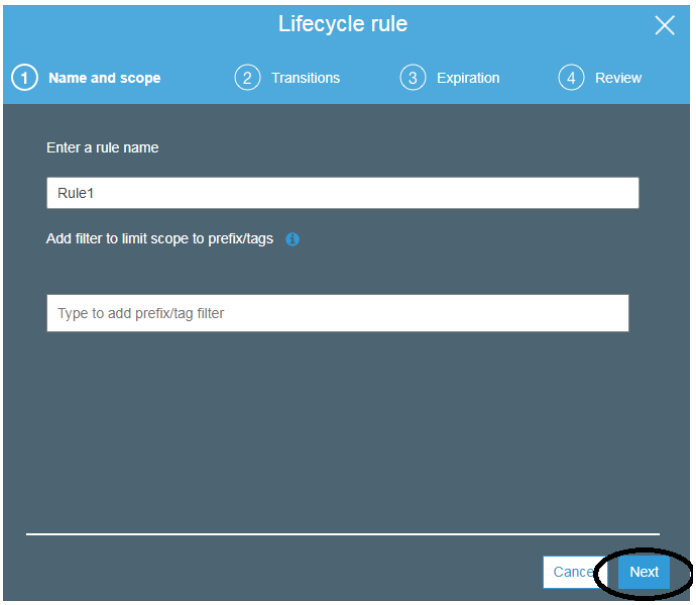
Configure the S3 bucket to move the objects from Standard (storage Class) to **Glacier**.

Steps:

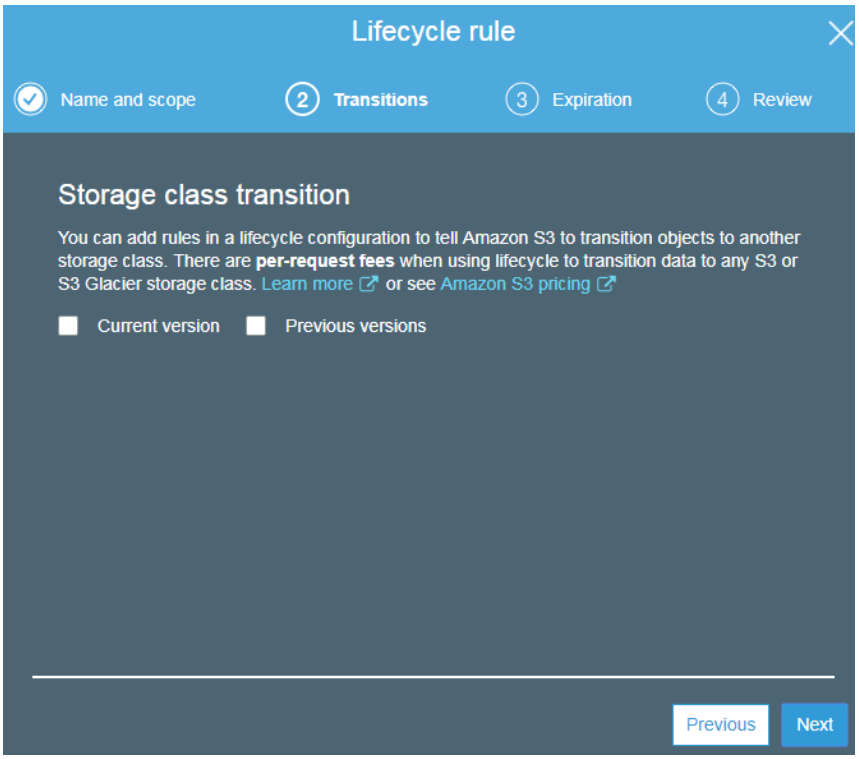
1. Create the Rule
2. Check the result

1. Create the Rule



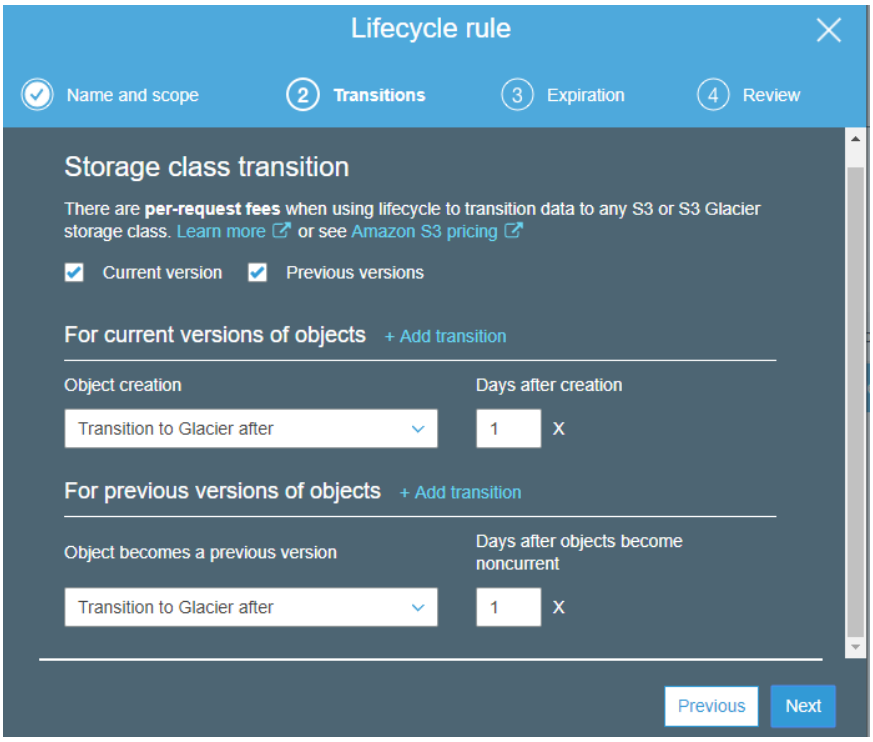


Click **"NEXT"**



Select "**Current Version**" if we have to take an action on the latest version of all the files.

Select "**Previous version**" if we have to move the pervious version of files to either Glacier or another storage class.

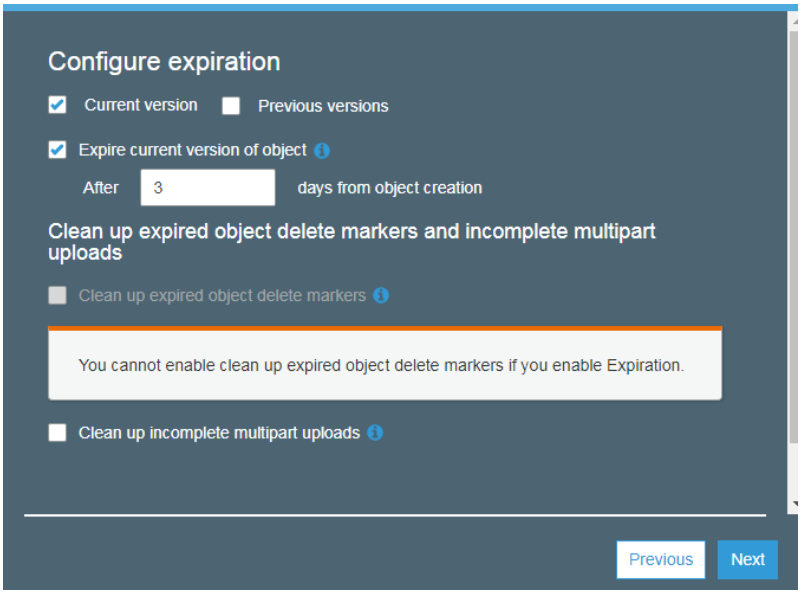


Under the **"Days after creation"** , the min value can be **"1"** for "**Transition** to **Glacier**".

Note:- That we can individually provide the transition's for Current and previous versions.

This would move All the files (Even the one uploaded before this Rule was created) to Glacier. (Archiving system)

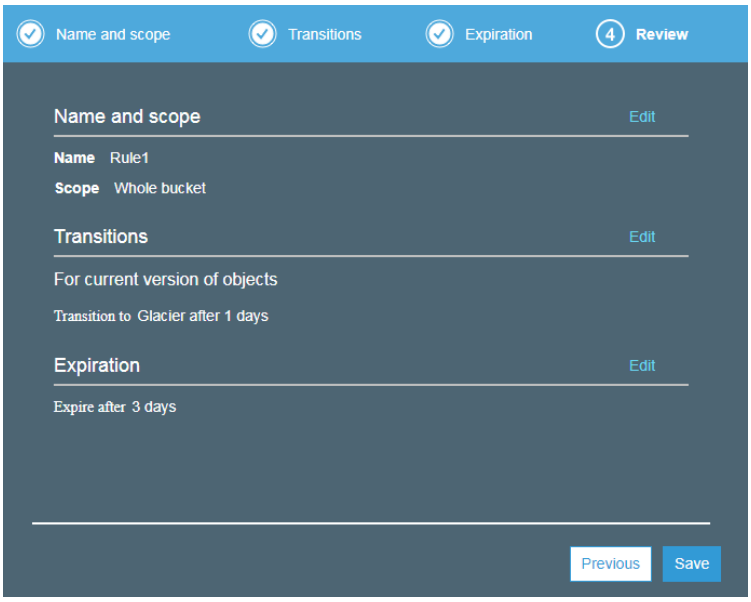
Click on **"NEXT"**



Here we could configure the **expiration** of the objects.

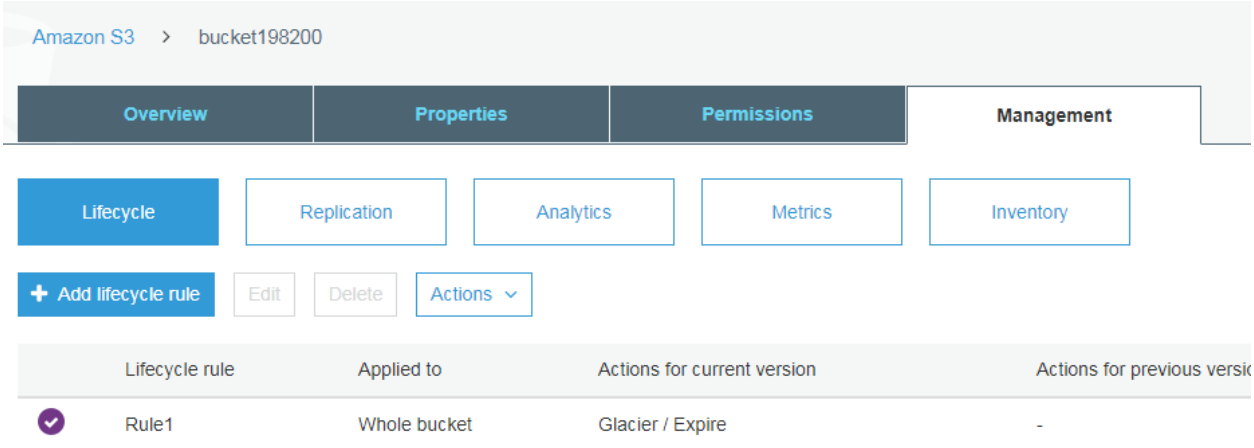
So in this case, it would **expire** after **"3"** days.

Click on **"NEXT"**



Click on **"SAVE"**

**OUTPUT:**



Amazon S3 > bucket198200

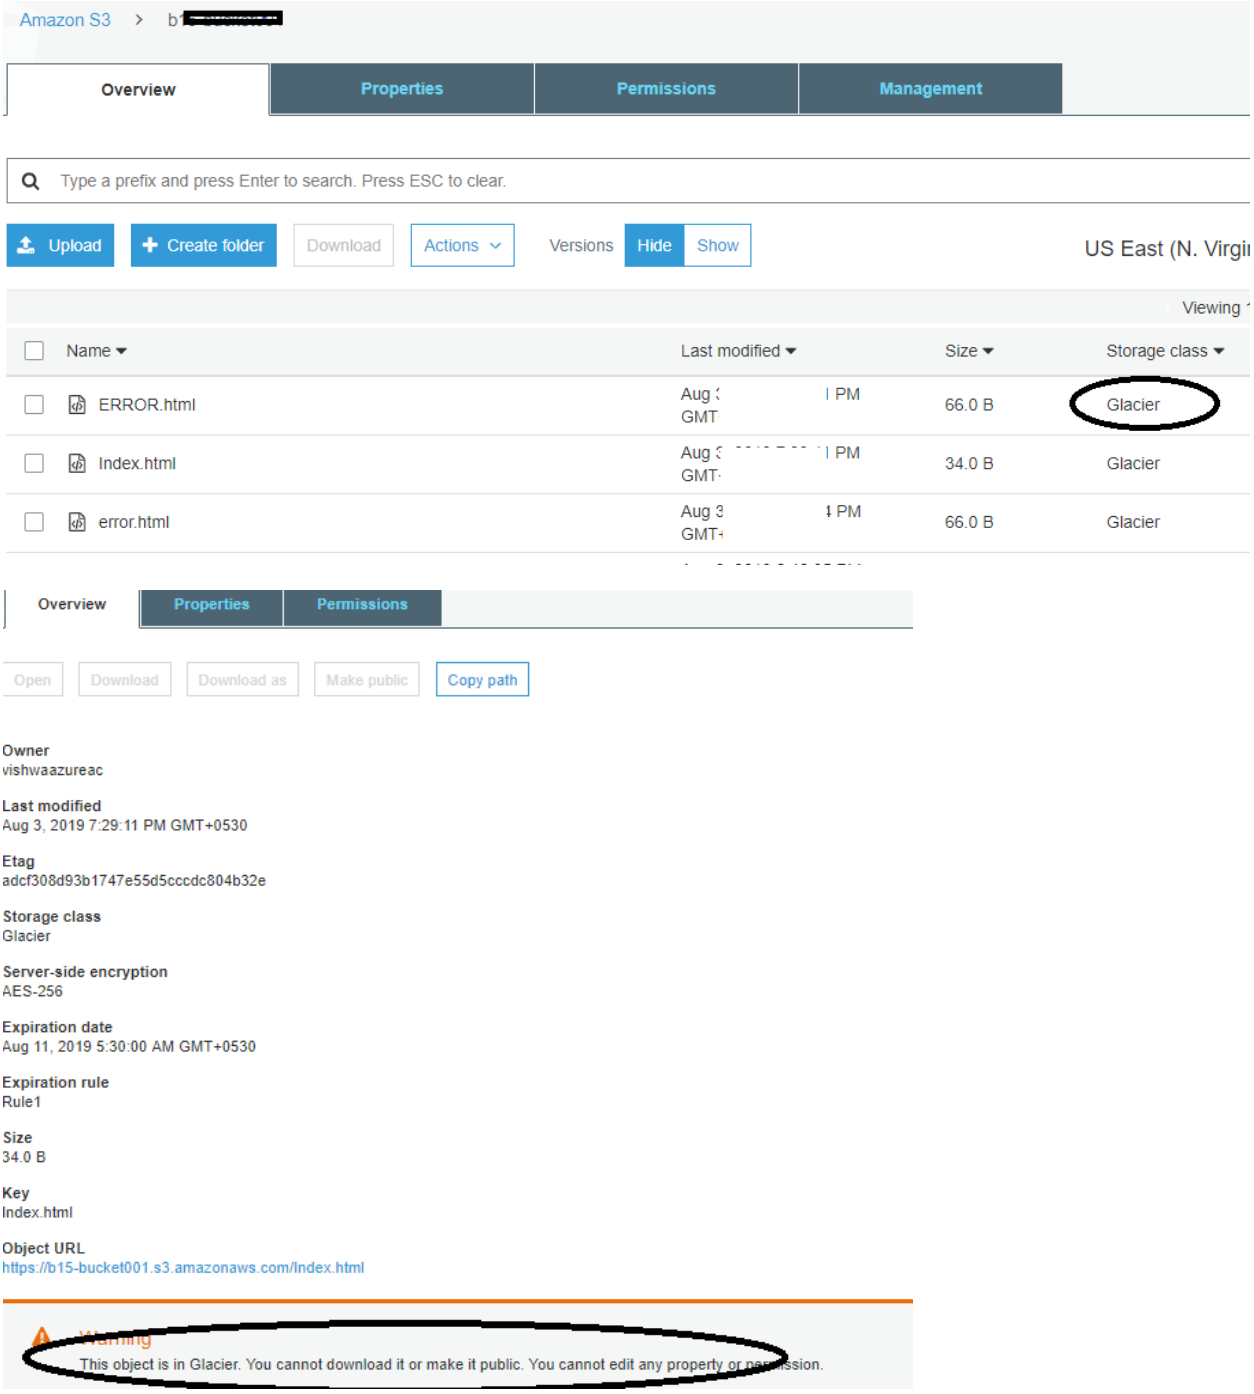
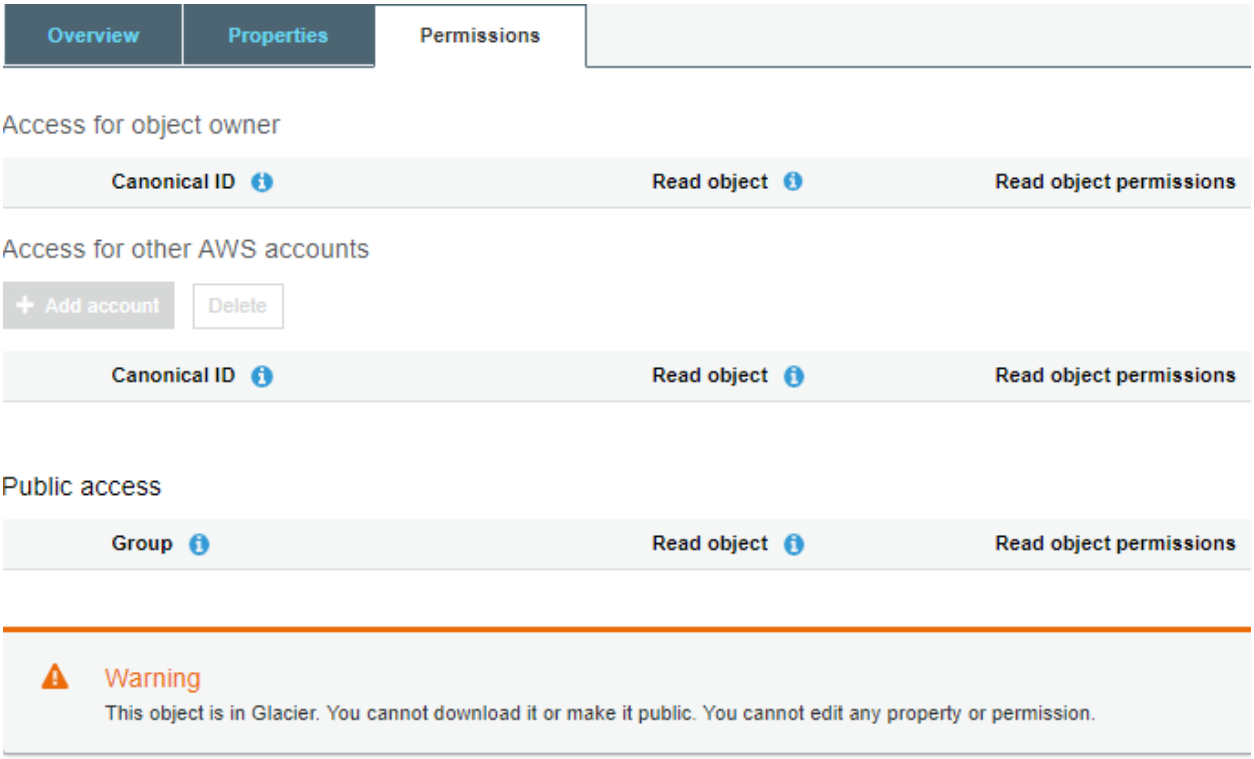
## 2. Check the result



This clearly show that the file is moved to Glacier and it would not be accessible.

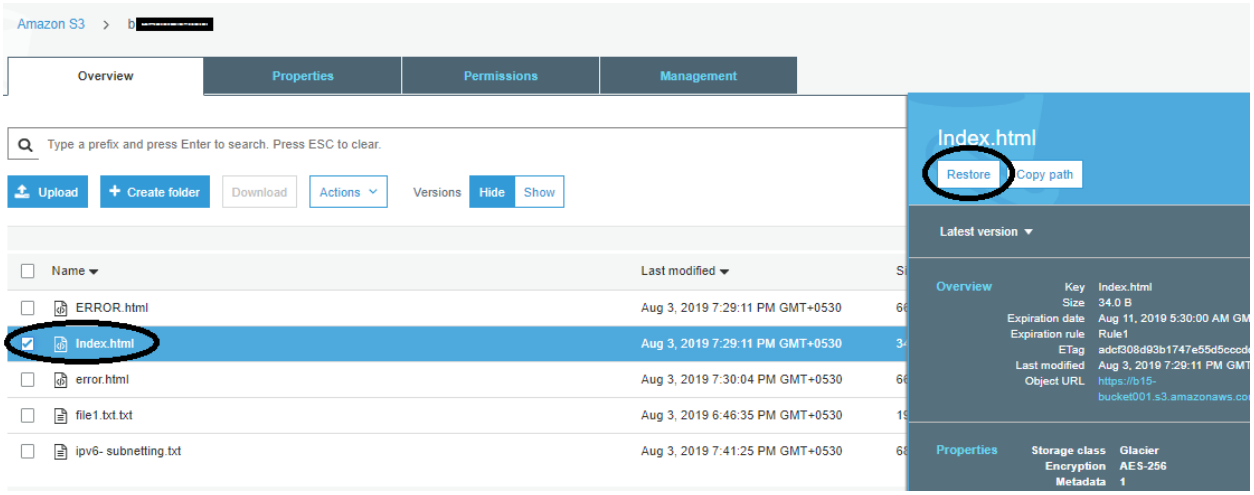
But, the file still stay's under the same Bucket.

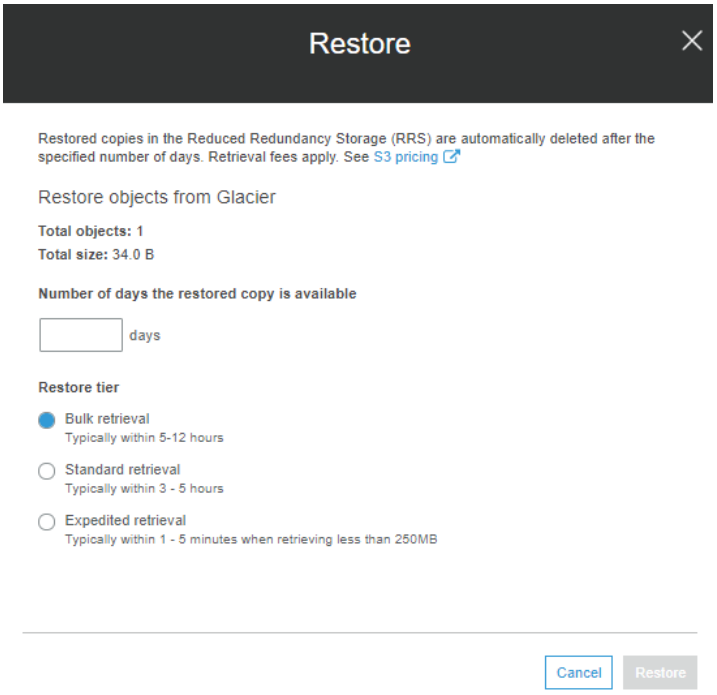


Even the properties of the files cannot be edited.

### 3. Restore the file

Click on the bucket and select the file and now click on the “Restore” .





Mention the no of days, you would like to keep the restored copy.

Eg:- 10 (For 10 Days, the file would be copied to RRS, but the main copy still stay’s in Glacier until it expires.

**Restore type**

Here, we have 3 options,

Let’s select **“Standard retrieval”**

Restored copies in the Reduced Redundancy Storage (RRS) are automatically deleted after the specified number of days. Retrieval fees apply. See S3 pricing

Restore objects from Glacier

**Total objects:** 1

**Total size:** 34.0 B

**Number of days the restored copy is available**

5 days

Available until approximately 2019-08-13

**Restore tier**

- Bulk retrieval
  Typically within 5-12 hours
- Standard retrieval
  Typically within 3 - 5 hours
- Expedited retrieval
  Typically within 1 - 5 minutes when retrieving less than 250MB

Cancel Restore

Now, click on the file itself.
